S U M M A R Y

Electrical & Automation Technician with 5 years of full-time experience (October 2020 – October 2025) in the large-scale manufacturing industry at PT DJARUM. I have a proven track record in managing electrical and automation systems across 4 specific production areas (West, East, North, and South) with a total of 33 machines, and in my most recent role as a Secondary Electrical Technician, I was responsible for the entire factory (a total of 6 production areas).

My core competencies include scheduled preventive maintenance, troubleshooting critical failures, PLC programming and root cause analysis to prevent recurring failures.

I have now completed my tenure and am seeking new opportunities in industrial automation, machine maintenance, or control systems, with a commitment to making a tangible contribution to the company through the reliability and efficiency of production equipment.

E X P E R I E N C E

Secondary Electrical Technician | PT DJARUM | 05/2025 - 10/2025

Managed electrical maintenance for production lines in all areas (total 6 areas), with a focus on continuous improvement in terms of both scheduled maintenance and machine problems that cannot be resolved by each area.

PREVENTIVE MAINTENANCE

- Collect data related to what is needed to replace routine parts on one machine that is subject to preventive maintenance.
- Doing preventive maintenance according to the predetermined schedule from the schedule planner and do it according to the assignment of how many hours the machine works.

QUICK RESPONSE TEAM

- Collect data related to what is needed to repair a damaged machine.
- Troubleshooting machines from old generation to high generation based on the request of each area if needed

Electrical Technician - West Area | PT DJARUM | 03/2024 - 05/2025

Managed electrical maintenance for west area production lines with 9 machines, focusing on continuous improvement and knowledge sharing.

- Collect and analyze machine failure data to determine repair priorities, thereby minimizing production downtime.
- Troubleshoot older and mid-generation machines, including reading wiring diagrams and checking control components
- Maintaining the tools used to support the repair of the machine
- Organize schedules with production regarding machine repairs Preventive maintenance of machines in the west area
- Sharing knowledge to machine operators regarding problems that occur on the machine

Electrical Technician - East Area | PT DJARUM | 07/2023 - 02/2024

Responsible for electrical systems maintenance in the east production area with 6 machines, handling both conventional and automated machinery.

- Collect and analyze data related to what is needed to carry out repairs on one machine that has been damaged
- Organize schedules with production regarding machine repairs
- Sharing knowledge to machine operators regarding problems that occur on the machine

- Troubleshooting of mid generation machines

Electrical Technician - Northern Area | PT DJARUM | 03/2023 - 07/2023

Focused on PLC programming, automation systems, and process optimization for manufacturing equipment in the north area with 10 machines.

- Collecting data related to what is needed to carry out repairs on one machine that has been damaged
- Organize schedules with production regarding machine repairs
- Troubleshooting of mid generation machines

Electrical Technician - Southern Area | PT DJARUM | 03/2021 - 02/2023

Handled routine maintenance, breakdown repairs, and electrical system upgrades for production facilities in the south area with 8 machines.

- Collecting data related to what is needed to carry out repairs on one machine that has been damaged
- Machine troubleshooting from the older generation to the middle generation
- Maintaining the tools used to support the repair of the machine
- Organize schedules with production regarding machine repairs
- Preventive maintenance of machines in the south area
- Sharing knowledge to machine operators regarding problems that occur on the machine

Junior Electrical Technician | PT DJARUM | 10/2020 - 03/2021

Started career in industrial electrical maintenance, learning fundamental skills and company procedures.

- Know the quality of products from raw materials to ready-to-use materials
- Knowing what materials are used to make a product
- Operate the machine to know the workflow of the machine, manage raw materials into a product to be ready for use (Maker and Packer)
- Troubleshooting for machine repair with electro category

EDUCATION

Teknik Elektro Otomasi (D3) | Institut Teknologi Sepuluh November Surabaya (ITS) | 09/2016 - 09/2019

- Achieved a GPA of 3.03/4.0

ACADEMIC PROJECTS

- Designed and implemented automated packaging system using PLC or Microcontroller
- Create electric current monitoring using a local website based on Raspberry Pi and NodeJs
- Created preventive maintenance schedule for manufacturing equipment
- Designed electrical control panels for industrial machinery

SKILLS

PLC & Automation: CX-Programmer, TwinCAT, HMI, Control Systems

Maintenance: Preventive, Corrective, Troubleshooting

Tools: SAP DMS, Wiring Diagram, Root Cause Analysis
